

AdBlue® DEF IBC Dispensing System

The Hill Pumps air operated AdBlue® IBC dispensing unit is perfect for effortlessly transferring AdBlue® directly into trucks, agricultural, commercial vehicles and an extensive range of passenger cars.

The unit comes complete and is ready to go just plug and play.

Air operated AdBlue® pump

Automatic shut off dispensing nozzle

Electronic flow meter

All hoses and fittings

No electricity required, just plug in to the workshop airline and pull the trigger.

Can be used outside too as many workshops have an airline fixed or reaching outside.
